GPA: 4.0, Paula Rhodes Memorial Award for Exceptional Achievement

May 2025 | New York, NY

IED - Istituto Europeo di Design

BFA in CG Animation

Summa cum laude

2023 | Rome, Italy

ABOUT ME

What excites me most about computer graphics is the ability to express psychology and performance through every detail. I enjoy pushing technical tools in service of storytelling and character development.

Through work on large-scale industry projects ranging from broadcast spots to Super Bowl advertising, as well as taking on leadership roles in smaller independent short productions, I have developed adaptability and problem-solving skills to realize each project's artistic vision. Clear communication and collaboration have been essential in understanding client needs and working closely with the team to bring ideas to life.
